

Malmsten GOLD Racing Lane Line - Ø 150 mm

**Official FINA racing lane line – made by Malmsten in Sweden
– in the Games since 1976!**

The best wave breaker and turbulence control on the market. Recent studies* have proven that the Racing Lane Line Gold (150mm) Malmsten reduces water turbulence and wave energy by up to 90 percent. It also concluded that the Malmsten Gold line is the most efficient racing lane line on the market today. Proven performance.

The importance of a good wave breaker:

In a competition it ensures the best possible pool conditions – for record breaking - and in the “every-day-pool”, all pool goers enjoy calmer pool water.

**Selected by FINA and LEN
for all major competitions**

**wave-energy dampening studies at KTH, Sweden.*

Unique qualities:

- Flow-through technique
- Designed for minimal water bounce back
- Each disc rotating motion
- Water positioning
- Durability

Product description:

25-m, 50-m long or custom length
Discs of 150 mm

Selected When it Counts

Functional racing lane line:

Fitting to the pool:

- Installed with take-up reel and tension spring in pool water
- If anchoring on pool deck, ask for permanent extenders
- If anchoring builds into the pool water, inform us so that material used may be adjusted

Good wave energy dampening* of lane line is achieved when:

- Each disc rotates individually. Discs align along lane line
- Material covers ss wire. When material is being "pushed back" a maximum of 15 cm bare wire may be seen
- Take-up reel is tensioned (with Malmsten original ratchet wrench) so that tension spring opens less than 1 mm

* Refer to user manual for more information

More Material = More Weight = Better Water Position

Original Take-up reel is a precision tool

Softer material to avoid discomforting cracks in discs

Best color fastness of 8/8, with additional anti-oxidants: 5% Irganox 1330

Best UV-protection of 8000ppm

Harmless material with no traces of heavy metals

Water turbulence control

Strong, safe and flexible ss316 wire; 4 mm with 7x7 threads

Latest industry polyethylene

Flow-through design

More material thus better functionality

Gold	Discs	Competition line	W.E. dampening*	Weight	Volume	Incl. take up reel and tension spring
50 m	150 mm	Yes/Official FINA	87,50 %	94 kg	1,44 m ³	Yes
25 m	150 mm	Yes/Official FINA	87,50 %	47 kg	0,77 m ³	Yes

Better material for durability

Wire PRO - Flexible & Strong	Disc SUPERIOR	Color fastness	UV stab.	Anti-oxidant protection	Free of heavy metals	Stress tested
ss316, 4 mm, 7x7 threads	Polyethylene	8 on 8 / Yes	8000ppm	5 % Irganox 1330	Yes	Yes

* Wave energy

Choice of color combinations

FINA-competition rules:

3 leading lane lines in yellow, followed by 4 or 6 blue and the two outer lines green

Marking:

Red: 5 m each end
 Red: 15 m
 Red: 25 m (only for 50 m lines)

**Original Malmsten:**

Blue and white - 40 cm color segments

Marking:

Red: 5 m each end
 Black: 15 m
 Red: 25 m (only for 50 m lines)

**Rainbow by Malmsten:**

Orange, yellow, green, blue, purple - 2 m color segments

Marking:

Red: 5 m each end
 Red: 15 m
 Red: 25 m (only for 50 m lines)

**Customize your own lane line:****Color options***Selected When it Counts*
