Coat Rack with Bench

Sturdy movable coat rack with bench, especially designed for Malmsten for water polo games and training.

A handy and mobile rack that is perfect to place on the pool deck, one at each end of the field, during water polo games and training. Designed especially for players' bath robes and supplies. With its 6 slats it is also comfortable to use as sitting bench. Slats allow for quick water drainage.

The rack is equipped with 8 double hangers, a bench with a shelf underneath and a top shelf. Easy to move around with its 6 castor (4 lockable)

Product description:
2000 x 570 x 1900 mm

Seat height: 450 mm

Free space between seat and top shelf 1400 mm

Selected When it Counts

Referees' structure Catwalk - Upgrade

Effective March 1st, 2019, there is an amendment to the existing FINA water polo rules. In short, the new rule requires the yellow field to increase from 3 m to 4 m each side, with a red line - to mark foul throws - (at 3m of this 4m) at 5m from goal line.

We offer easy to use upgrade kit for matting on Malmsten referee's catwalk, consisting of 4 pieces of yellow matting 0,9x1m with red matting 0,1x1m adapted for the referee's catwalk.

This matting may be fixed with carpenters glue, which is not included in this kit.

Unique qualities:

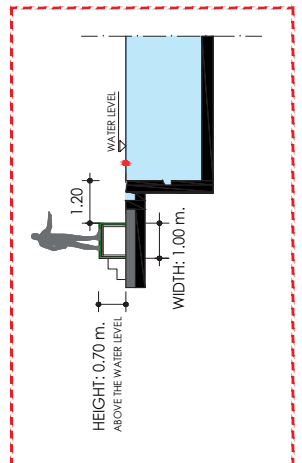

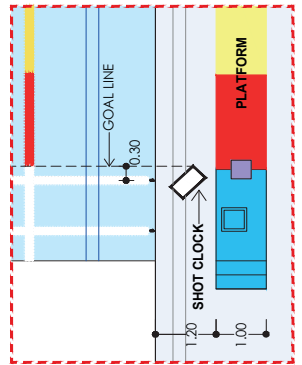

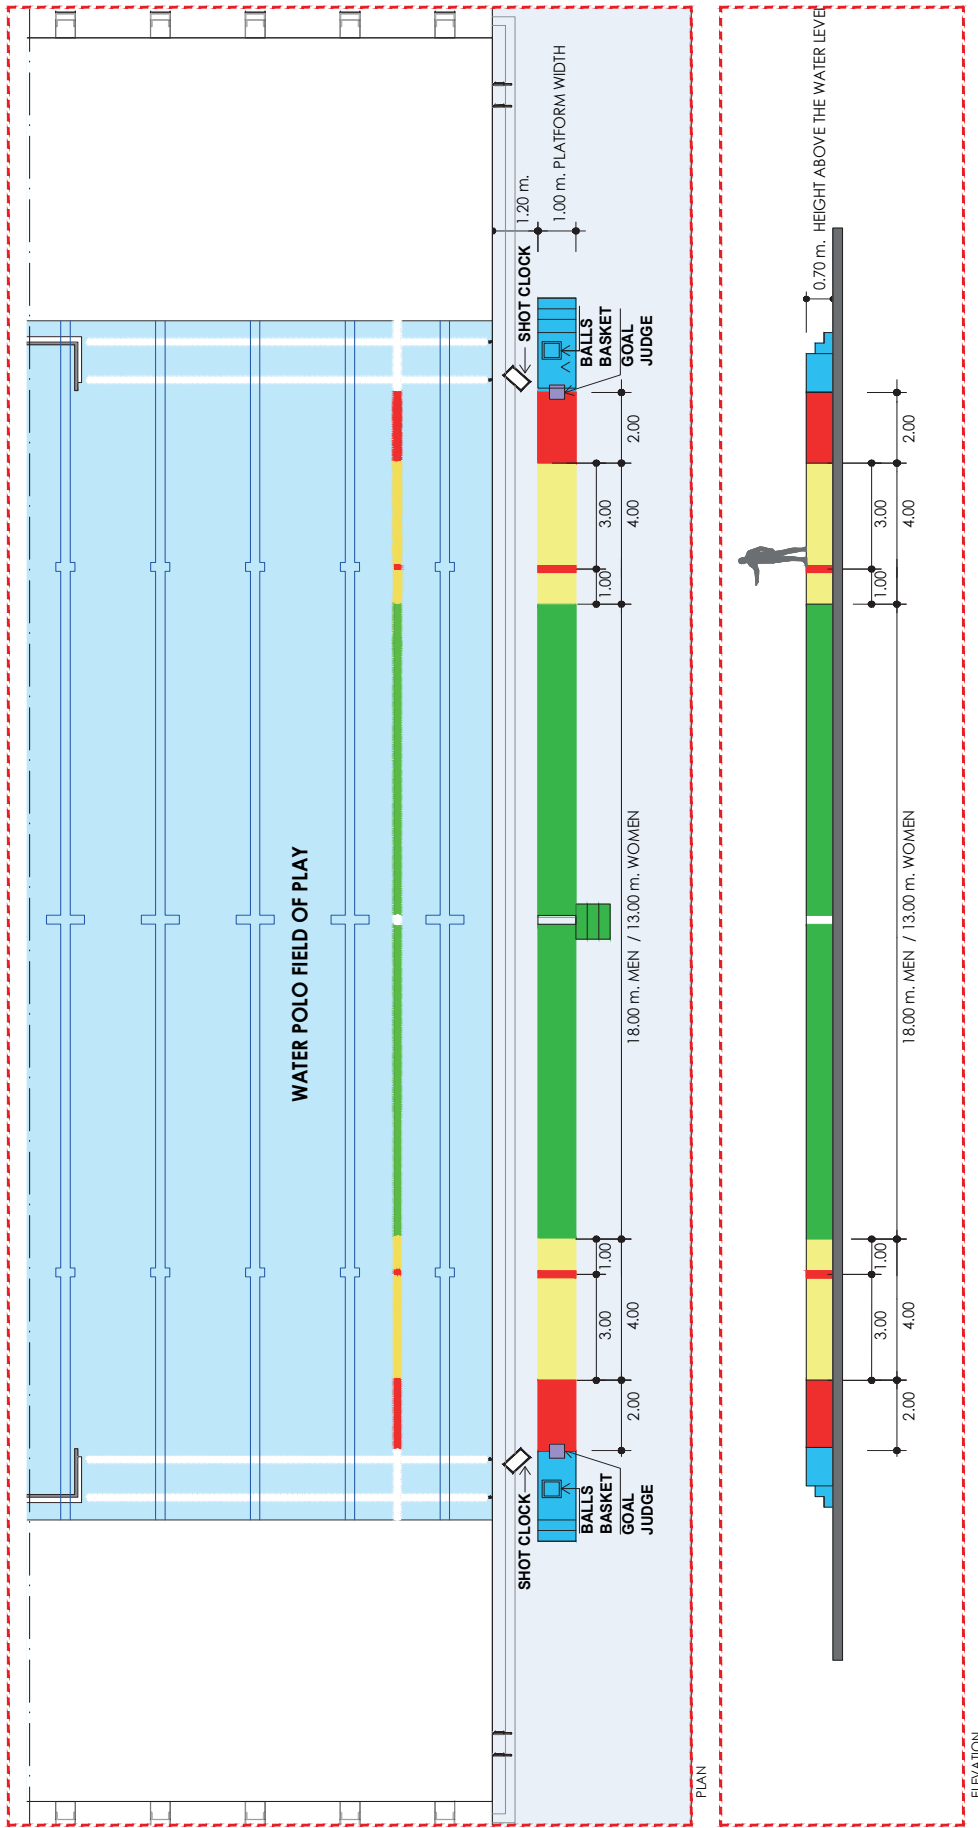

- Official FINA
- Top of the line
- Commercial design aluminium structure
- Solid and water resistant
- Marine grade plywood
- Excellent anti- skid cover treated against dirt and bacteria built-up
- Storage boxes on wheel (sold separately)

WP Field with Goals 2150 mm – Portable/Inflatable

This complete set includes field of play 20x15 m (adjustable to 20x11 m) together with two goals 2150 mm (2150x750 mm).

Official HabaWaba equipment U9 and U11.

Portable and easy to move and store. Packed in three bags

Product Specifications:

Goal width: 2150 mm

Goal height: 750 mm

Field: 20x15 m

Made of reinforced PVC

Shipping measurements:

1. 700x500x350mm (2 goals), 20kg.

2. 500x400x370mm (half field), 9,5kg.

3. 500x400x370mm (half field), 9,5kg.

Included:

3 Sport bags, 2 Medium pumps, Repair kit, Back-up valve, 2 Rubber ropes with hook

Our products are non toxic and green for the environment.

Unique Qualities:

- FINA and LEN standards
- Great for Waterpolo Clubs
- Great for Pool and Ocean Play
- Portable and easy to move and store
- Easy Quick Inflate / Deflate Valve
- Easy to maintain and use
- Auto Lock Valve System

Selected When it Counts

Referees' structure Catwalk

The Malmsten catwalk is a flexible system, easy to install and to put away after the competition.

The catwalk has the length of the field of play for water polo and is 1 m wide and 0,7 m in height. It is an easy hook-on system. For major championships, one catwalk is required along each side of the field of play (sold per unit).

The catwalk has the color markings of the field of play. The color-coded matting is an easy roll-out carpet according to FINA revised rule, effective March 2019, and comes with an add on to inter-change between field of play men and women.

Easy conversion from men to women marking by pulling the 2 yellow pieces inwards (to indicated position 25 m). The catwalk can be delivered in Lockable Storage boxes on wheels (sold separately). Art. nr. 1514010

This platform may be used for other activities around the pool.

Unique qualities:

- Official product for LEN and FINA
- Top of the line
- Commercial design aluminium structure
- Solid and water resistant
- Marine grade plywood
- Excellent anti- skid cover treated against dirt and bacteria built-up
- Easy hook-on system. Lockable
- Storage boxes on wheel (sold separately)

Product description:

Dimensions:

Total length: 32 m + stairs = 33,6 m

Height: 0,7 m Width: 1,0 m Length/Section: 2 m.

2 short steps at each end (2 x 0,5 m steps)

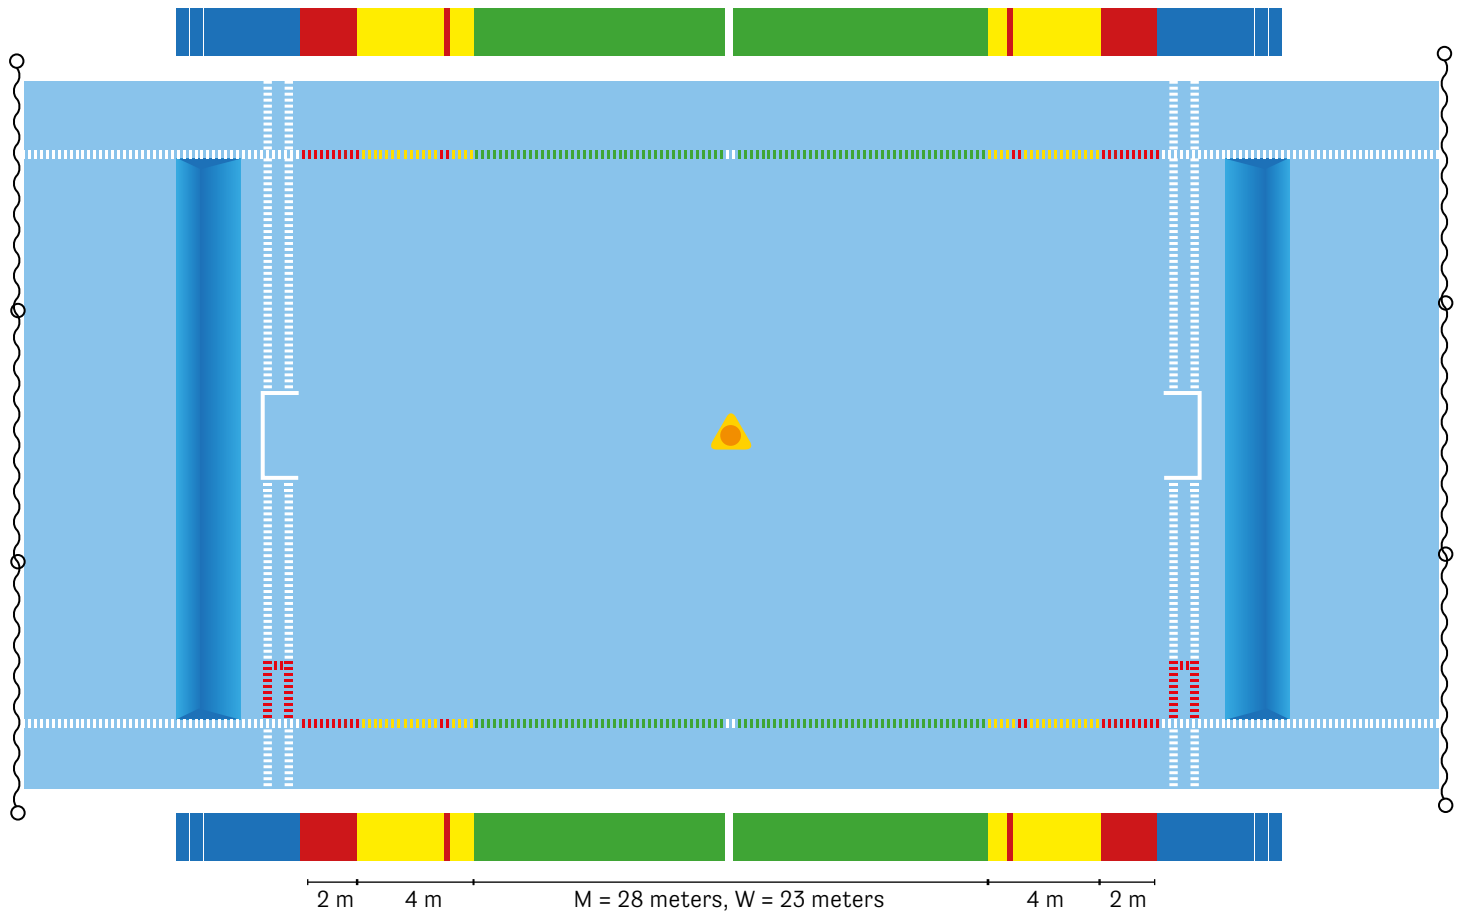

Matting:

1 x 18 m green with white centre mark
2 x 4 m yellow (with red fowl line), 2 x 2 m red, 2 x 1 m blue
2 x 2,5 m blue matting is included for converting to women's field of play (There is no matting on the stairs)

Sold per unit

Selected When it Counts

Technical information

- 1 complete catwalk is stored in 4 boxes on wheels. A total of 8 storage boxes for the 2 complete catwalks.
- For one pool, the 4 boxes are marked with 1 and 2, where 1 & 2 should go on one long side of pool and the other 1 & 2 on the other long side of pool.

- Before storing in boxes; hose off with clean water, wash dirt with luke-warm water and light soap. Let dry. Wipe the boxes.
- Keep in well ventilated area and out of direct sun light. Do not keep boxes outside when raining.

Advertising structure for aquatic use

For water polo field of play; diving or synchronized swimming partition

Advertising structure in 4 parts, each 9,9m, inflatable and perfect for aquatic use.

Place for advertising banners on front and back.

Easy affixing of advertising banners (not included) on pre-sawn velcro.

Arrives with electric pump and may be transported easily.

Unique qualities:

- Strong plastic-treated trevira material
- With Velcro front for banner placement
- Easy inflated and deflated
- Comes in bags for storage and protection

Product description:

Material: Strong plastic-treated trevira material

Dimensions: 4 x 9,9 m (Length), Base: 1650mm, Height: 1000 mm

Information: Sold Per Set (4 units) Including one electric pump.

Important:

Electric pump is required – attention to not to use electric pump near water.

Usage instructions have to be followed, valves may not be opened. Air is pumped in or sucked out using the pump.

Selected When it Counts

Advertising structure for aquatic use

Useful information

- Advertising inflatable structure consisting of 4 units 9,9m x 1,65 x 1 m. With place for approximately 6, 12 or 18 banners the width of 0,7 m per structure.
- Be careful when opening storage boxes and handling the equipment. A cutting knife, sharp corners or dragging on pool deck may damage the unit.
- To inflate or deflate use pump and do while equipment is out of water.
- To inflate: 1. Close the zipper. 2. Unscrew the plug. 3. Push in the valve. 4. Place pump and blow in air. It should normally take about 30minutes for 1 structure. 5. When finished - screw back the plug.
- Place advertisement banners while inflated. It is possible to place two in front and one on the back.
- Place inflatable structure in pool water. You may attach with rope to pool deck, or use the suction plugs (8 units are included).
- When finished using - carefully remove from pool. Attention to that any sharp edge may damage the PVC. Rinse with clean water and let dry.
- When fully dried - deflate units.
- To deflate: 1. Open the zipper. 2. Unscrew the plug. 3. Use the "air-intake" side on the pump.
- To fit back into storage box it is crucial to tightly roll and fold the structure.
- Important - never touch the safety valves! These are used to automatically deflate unit when need be.
- In case of air leakage through a small hole - wipe area dry and affix repair sheet (included) with suitable glue for PVC (not included).
- Banners: approximately 6, 12 or 18 banners (per 20m structure) of 0,7 m width should be made with male 5cm Velcro straps on top and bottom. Attention: The Velcro on the inflatable structure is female.

Cones Water Polo Field Line

A set of 14 cones to be fitted onto the water polo field lines.

Manufactured in soft EVA-foam and easily affixed onto the field lines (100mm in diameter).

Unique qualities:

- Easily attached
- Can be used indoor and outdoor

Product description:

Material: EVA Foam

Dimensions:

Height: 31 cm, Width: 16 cm, Depth: 7 cm

Sold per set of 14

(2 White, 4 Yellow and 8 Red)

Water Polo Ball Release

The ball release is used for the start of play of water polo matches.

Retained on the half distance line, the ball is put into play when the ball release is submerged by pulling the rope from the side of the pool, allowing for fair and accurate starts every time.

At the start of play as the swimmers approach the ball, the ring is pulled under water and the ball released.

Unique qualities:

- Official FINA
- Fits men, women and junior size Water Polo balls
- Easy to install
- Easy to use

Product description:

EVA foam, high density plastic and stainless steel
 Float made from high density plastic and EVA-foam
 25 m retainer cord equipped with snap hokks for ease of installation
